NEW DELET 3 (INDIA);
The 28th August, 1950

8. P. JAIN,

for "Registrar General, India.

NATIONAL SAVINGS EDTITICATES

Are now available in three different series, maturing after 5.7 and 12 years. The certificates yield 3%, 3½% and 4-1/6% simple interest respectively, at maturity. The 12 years certificates increase your money by 50% but if necessary can be encashed after 18 months (Rs. 5/- certificates after 12 months). The 5 and 7 years certificates can be encashed at any time.

National Savings Certificates are obtainable in denominations of 5, 10, 50, 100. 500, 1,000 and 5,000 and you can invest upto Rs. 25,000 in them (inclusive of any Post Office cash certificates held).

Full particulars obtainable from all post offices, District Organisers of the Small-Savings Scheme, Assistant National Savings Officers, Provincial National Savings Officers or the National Savings Commissioner, Simia.

TODAY'S SAFEST AND MOST PROFITABLE INVESTMENT

Births and deaths from principal diseases in towns with a population of over 30,000 in India for the week ending the 5th August 1950—contd.

Explanation of symbols used:—B.=Births; B. R.=Birth rate; C=Cholera; S=Smallpox; P=Plague; F.=Fever; D. D=Dysentery and Diarrhoxa; R.D.=Respiratory diseases; M.D.=Maternal deaths; D.R.=Death rate; I.D.=Infantile deaths (included in total deaths)

REMARKS

The tigures of births and deaths shown in this statement for the week ending the 5th August 1950 relate to 168 towns with an estimated population of 19,122 thousands. The total number of towns is 233 and their population is 28,421 thousands. Thus 72% of the total number of towns representing 67% of the total population is covered in this statement. The numbers of births and deaths recorded in these towns were 13,144 and 6,914 representing birth and death rates of 35 7 and 18.8 per thousand of population respectively.

(A) States (Parts A and B).—The data here relate to 140 towns with an estimated population of 15,923 thousands. Information about Assam. Bihar, Madhya Pradesh and West Bengal could not be included. The total number of towns is 201 and their population is 24,668 thousands. Thus 70% of the total number of towns representing 65% of the total population is covered. The numbers of births and deaths recorded in these towns were 11,501 and 5,976 representing birth and death rates of 37.6 and 19.5 per thousand

of population respectively. The table at the end gives the position by states.

Chittoor in Madras was the only town which had a high death rate of 63.0 per thousand of population and this high death rate was largely due to deaths from cholera.

(B) States (Part B).—The data here relate to 28 towns with an estimated population of 3,199 thousands. The total number of towns is 32 and their population is 3,753 thousands. Thus 88% of the total number of towns representing 85% of the total population is covered. The numbers of births and deaths were 1,643 and 938 representing birth and death rates of 26.7 and 15.2 per thousand of population respectively.

No town recorded a high death rate of 50 or over per thousand of population.
